Introduction

This Handbook is a ‘Users’ Manual’ for your academic programme. It describes the structure of your programme, what resources are available for students and how to seek help of guidance when you need it. It directs you to the various resources on the Department website (http://www.bbk.ac.uk/ems/), the College website (www.bbk.ac.uk) and the research students website (http://www.bbk.ac.uk/ems/faculty/phd-students).

People, and how to reach them

The Programme Administrator handles all administrative aspects of the Programme, and is usually the first point of contact for students.

Beverley Downton: b.downton@bbk.ac.uk
Room: 716 Malet St
Tel: 020 7631 6403
Fax: 020 7631 6416

The Course Lecturers are in charge of academic issues specific to any lecture course, and first point of contact if you need any clarifications or help with the material covered in lectures. The easiest way to initiate contact with your lecturers is via email. The email address of faculty members is on the Department website, and is of the form: initial.surname@bbk.ac.uk

Programme Directors are in charge of the academic content of the programme.

- Programme Director for MPhil/PhD in Economics
  Dr Yunus Aksoy: y.aksoy@bbk.ac.uk
- Programme Director for MPhil/PhD in Mathematics and Statistics
  Dr Amarpreet Rattan: a.rattan@bbk.ac.uk

The Programme Director is the best person to contact if your academic difficulty relates to multiple courses. It is quite helpful to keep us informed of any issues or circumstances (health-related, work-related pressures, etc.) that might affect your performance or continuation on the programme.

See http://www.bbk.ac.uk/ems/courses/phd_programmes for further resources.

Information Technology (IT) Resources

Department IT Resources

The Department of Economics, Mathematics has its own Workstation Room, Room 742, for software specific to economics, finance, mathematics and statistics.

The Department Computer Representative coordinates queries relating to your College computer account and other IT services:

Nigel Foster (n.foster@bbk.ac.uk)
Room 759 Malet St, Tel: 020 7631 6402

The Department Student Help Desk is run by the department computing staff,

Nigel Foster (room 759; tel 020 7631 6402)
Awuku Danso (room 758; tel 020 7631 6433).
Email: helpdesk@ems.bbk.ac.uk at the following times
Term: Mon – Fri 16.00 – 18.00
Out of Term: Mon – Thurs 16.00 – 18.00

College IT Resources

Workstation Rooms

For more general software, College ITS manages multiple Workstation rooms in various parts to the College. These include
- College Main Building: Rooms 402, 412, 413, 422, 423 and 536;
- Gordon Square: Rooms 10 and 11, 43

**College IT Services Reception/ Help Desk**

Ground floor, College Main Building, telephone 020 7631 6543

The College is closed on specified holidays over Christmas and Easter and on Bank Holidays. For a complete listing, and details of service availability on these holidays, see the College Calendar at [http://www.bbk.ac.uk/about-us/term-dates](http://www.bbk.ac.uk/about-us/term-dates)

**Programme Structure**

The programme structure differs for Economics students (which includes students in Finance and Mathematical Finance), and Mathematics and Statistics students. Where appropriate, we have made clear the distinctions below.

The Bloomsbury PhD Programme (Economics) is a high-level training programme for students aiming towards a research degree in economics or finance. The programme is taught by the Department of Economics, Mathematics and Statistics at Birkbeck and the Economics Department at the nearby University College London. Full-time students undertaking the programme are first-year (or in exceptional cases second-year) research students, already in possession of a suitable Master's degree. For Mathematics and Statistics students, the programme is wholly taught and administered by Birkbeck.

The UK MPhil/PhD involves significantly less coursework than a US PhD and therefore students must have MSc degrees or their equivalent on entering. Normally we do not consider applications from those students whose average grade is less than 60% across all modules of an MSc degree. Birkbeck offers MSc programmes in Economics, Financial Economics, Finance, Financial Risk Management, Financial Engineering, Mathematical Finance, and Mathematics and Statistics.

According to University of London regulations, students are initially registered for the MPhil degree. Subject to satisfactory progress (completion of at least one thesis chapter which is not a survey of the literature) and presentation of their research in the doctoral seminar of the Department, they then transfer registration to PhD, normally during their second year. The rest of the PhD involves writing a dissertation under the supervision of a faculty adviser. The programme (for Economics and Finance students) is administered by the department and taught by the department and UCL for some options, and is supported by the College Research School. For Mathematics and Statistics students, the programme is wholly administered by Birkbeck.
Admission Procedures

The successful completion of a PhD depends significantly on the personal relationship of the students with their tutor. Therefore we only admit MPhil/PhD students if there is a qualified supervisor in their area of interest. Our admissions policy is based on three criteria. First, the student must be of high academic ability. We usually require the equivalent of a “Merit” in a taught MSc Economics or Finance course and a distinction in their MSc dissertation. If any deficiencies in previous training are identified, the student may be required to undertake further MSc level coursework. Second, the prospective student must have a carefully thought out research proposal. Third, there must be a qualified supervisor in the department who is both willing and able to supervise the student in his or her chosen line of research. There is no application deadline.

Support Procedures

The supervisor is typically supported in the task of supervision by a second supervisor. Multiple supervisors are of great value when the student’s interests span several areas of specialisation, and it allows the student to gain a second opinion. Because the department is small relative to other UK economics departments, the culture is one of intimacy and relative informality. Academic staff know their students and are aware of their backgrounds, personal circumstances, needs and difficulties.

Research students meet their supervisor(s) regularly during term-time and at other times by arrangement. The department provides full-time research students with a desk in a room shared with other research students. Full-time research students also have exclusive access to a computer; further advice on the use of computing facilities and software, and access to the many libraries of the University of London is given in given in this handbook.

In addition, full-time first-year MPhil/PhD students in Economics and Finance are required to complete four modules covering topics on the cutting edge of recent developments in economic theory and methodology. These modules form a part of the Bloomsbury PhD Programme in Economics, taught by two colleges of the University of London - Birkbeck College and University College London.

Research students are supported by once-a-term MPhil/PhD Jamboree where they have the opportunity to present their ongoing research. Research students can only transfer from MPhil to PhD registration upon satisfactory presentation of a research paper at a seminar in the department and approval of the presented paper by two members of the academic staff other than the supervisor. (Upgrade form is available at http://www.bbk.ac.uk/ems/faculty/phd-students) The termly PhD Jamboree is also a valuable means of providing students with feedback on their research and with practice in seminar presentation. Full-time research students are also required to attend departmental seminars and lectures; part-time students are encouraged to do so.

PhD students working in the area of macroeconomics are typically become members of the Birkbeck Center for Applied Macroeconomics (BCAM) which organizes a yearly conference in which students have the opportunity to present their work in poster sessions.

Monitoring Arrangements

The Department of Economics, Mathematics and Statistics actively monitors the quality and effectiveness of its PhD programme. In addition to informal meetings, formal evaluation of student’s progress takes place each academic year.

Year 1 and Coursework

All first-year full-time research degree students are expected to take part in the programme. Part-time PhD students are encouraged to take part. Appropriate coursework for part-time students and their advisors will agree upon which modules, if appropriate, the student will be required to take. The MPhil Research plan must be filled in by the student and their Principal supervisor(s) within the first 3/6 months of study (FT/PT students) and
submitted to the Department's Postgraduate Research Tutor for feedback and approval. The research plan should be reviewed at the end of the first year of study, by the student and their Principal supervisor(s), and amended as appropriate. Thereafter, it should be reviewed annually by the student and their Principal supervisor(s).

**Economics (including Finance) Students**

In Term 1 (October-December), students are required to follow two advanced modules.

- [Topics in Applied Macroeconomics at Birkbeck](#)
- a module from MSc Options available at Birkbeck or MRes courses at UCL.

In Term 2 (January-March), students are required to take at least two modules from MSc Option modules available at Birkbeck or MRes courses at UCL. In addition to the choice being from the approved list, each student's choice of courses is subject to her/his Principal Supervisor's approval. Criteria for approval include relevance to the student's research and novelty of the material to the student: students will not be allowed to retake courses identical or very similar to those already taken at MSc level. Each of these courses is examined in a way deemed appropriate by the course lecturer. Students are normally expected to achieve a grade of at least 60% in all required courses in order to be admitted into the second year of the programme.

Courses from the following programmes will be offered this year.

- [MSc Economics](#) at Birkbeck
- [MSc Financial Economics](#) at Birkbeck
- [MSc Finance](#) at Birkbeck
- [MRes Programmes](#) at UCL
- [London Graduate School in Mathematical Finance](#)

The London Graduate School in Mathematical Finance is a consortium of the mathematical finance groups at Birkbeck, Brunel University, Imperial College, King's College, LSE and UCL. Its primary purpose is to provide a programme of advanced courses in mathematical finance, primarily for first-year PhD students in the various groups.

**Mathematics and Statistics Students**

For Mathematics and Statistics students, there is no set modules to attend. Instead, students will agree with their supervisors and programme director on an appropriate list of modules to be taken.

**Year 2 and MPhil/PhD Upgrade**

After satisfactory completion of their coursework students' progress to year 2 and embark in their research. Normally by the end of the second academic year and with the approval of their supervisor, they are expected to present their first paper (chapter) of their dissertation at the PhD Jamboree. This is typically a termly full afternoon event where most faculty and PhD students attend and provide feedback to the ongoing research. Subject to satisfactory progress (two academic members other than the supervisor have to approve the research paper) and presentation of a seminar, they then transfer registration to the PhD program, with retrospective effect, during their second year.

**Departmental Seminars at Birkbeck**

All full-time PhD students are required to attend the departmental seminars in their appropriate field; the department has a seminar series in Economics, Finance and
Mathematics and Statistics. Typically these take place Wednesdays at 12:00. Part-time students are strongly encouraged to do so.

In addition there are PhD student seminars. These are intended for both completed papers and also for work in progress. Each student is expected to give at least one such seminar during the course of their studies.

There are also wide ranges of seminars at other colleges of the University of London, which may be useful for students' research. To receive regular e-mail updates please register at the departmental seminar mailing list.
https://lists.bbk.ac.uk/mailman/listinfo/econseminars
https://lists.bbk.ac.uk/mailman/listinfo/mathseminars

**ESRC DTP Funding for Economics (including Finance) Students Only**

ESRC PhD Scholarships are available via UCL, Bloomsbury and East London Doctoral Training Partnership (DTP) for suitable candidates. These scholarships are for Economics, and only available once offered a place on a PhD programme at Birkbeck. As of 2017-18 academic year ESRC Bloomsbury Doctoral Training Centre will be replaced by the UCL, Bloomsbury and East London Doctoral Training Partnership. The Department of Economics, Mathematics & Statistics will be the lead institution of the Economics pathway of the Doctoral Training Partnership (DTP). Information about the new DTP is available at https://ubel-dtp.ac.uk/.

The remainder of this document is not specific to the programmes in the Department of Economics, Mathematics and Statistics, but are the College’s Code of Practice for Postgraduate Training and Research for Research Degrees and the College Policy and Procedure for the Termination of a Student’s Registration.
Birkbeck, University of London: Code of Practice for Postgraduate Training and Research for Research Degrees

Introduction

1. The Mission Statement of Birkbeck, University of London (referred to as “the College” throughout the rest of this Code of Practice) states:

The principal aims of Birkbeck are to:
• Provide part-time higher education courses which meet the changing educational, cultural, personal and career needs of adults; in particular those who live or work in the London region.
• Enable adult students from diverse social and educational backgrounds to participate in our courses.
• Maintain and develop excellence in research and provide the highest quality research training in all our subject areas.
• Make available the results of research, and the expertise acquired, through teaching, publication, partnerships with other organisations and the promotion of civic and public debate.

The key supporting objectives are to:
• Offer our students an integrated range of flexible, research-led courses across all levels of provision.
• Achieve and maintain strong research cultures in support of interdisciplinary work in each school and faculty.
• Ensure the College provides an inclusive working and learning environment for its students and staff so that all may develop to their full potential.
• Develop the College’s capacity to respond rapidly to new and changing opportunities in higher and further education.
• Develop sustainable partnerships within the London region and beyond.

2. The College undertakes to provide the following for all research students, sometimes in conjunction with neighbouring or collaborating university and college institutions:

• appropriate environments in which to work, which are conducive to interaction with fellow researchers and academic staff;
• appropriate library and laboratory facilities;
• access to appropriate computing facilities and accompanying technical support.

3. The purpose of this Code of Practice is to establish clear and explicit mutual expectations between the College and its research students, and to minimise the risks and problems of personal difficulties, inadequate supervision, or unsatisfactory student performance.

4. This Code of Practice is informed by the QAA Code of Practice Section 1 (Postgraduate Research Programmes) as well as the expectations of the research councils in relation to induction, training, monitoring, supervision, examination and award of research degrees.

5. In addition to this Code of Practice, Departments and/or Schools may publish as necessary more specific statements of School / Departmental requirements and arrangements.

6. For the purposes of this Code of Practice the term “Department” includes all of the academic departments of the College and the School of Law.

7. This Code of Practice was considered and recommended for approval by the Research Student Sub-Committee on 3 November 2011. It was approved by Academic Board on behalf of the College on 27 February 2012.
Institutional Arrangements

8. All research students of the College are registered and enrolled within the Department that is the primary focus of their research.

9. The College awards research degrees of the University of London. The College's research degree regulations define the conditions that each student must satisfy in order to qualify for the award of this research degree.

10. The College has established a Research Student Sub-Committee, reporting via the Research Committee to Academic Board, to oversee the development and implementation of research student policy and regulation. The Research Student Sub-Committee will monitor the success of postgraduate research programmes by, inter alia, monitoring submission rate data from departments and results of appropriate surveys such as the Postgraduate Research Experience Survey.

Research Environment

11. Departments should outline to their research students the resources available to them and the opportunities to take part in seminar and other programmes, both to present their own research and participate in the research of academic colleagues and other students.

12. Postgraduate research students are expected to participate in and benefit from the postgraduate life of the College. It is the responsibility of the student’s Department to create and sustain the sense of intellectual and academic community among its research students. Departments should encourage students to participate in College, School and Departmental workshops, research seminars and reading groups, especially those which provide an opportunity for students to present and discuss their own work. Departments should also encourage students to participate in academic conferences, in order to extend their understanding of the subject and its context, to present their work to specialists in their area of research, to make contact with researchers from other institutions and countries, and to provide opportunities for relevant collaboration.

13. The College has established the Birkbeck Graduate Research School, which provides training and other resources open to all research students of the College.

14. The key aim of the Birkbeck Graduate Research School (BGRS) is to enhance the student experience of the College’s research students. The BGRS is led by its academic director, and managed from Registry Services; it reports regularly to the College’s Research Student Sub-Committee.

15. The BGRS facilitates and advises departments in the provision of generic research training appropriate to their disciplinary research area and in other matters relating to postgraduate training and research. It delivers training for staff and students in a range of generic skills as well as facilitating the delivery of generic skills training within departments and schools.

16. Departments should maintain and make available as required information on welfare and support systems for research students, as well as information regarding sources of professional and medical help and advice. Students should be made aware of specialised support available to them beyond the Department, such as advice from the College Disabilities Officer, Students Union, or Student Financial Support Office.

17. Departments should ensure that students and their supervisors, are made aware of the procedures which allow suspension of registration in the case of illness or special personal problems.
Selection, Admission and Induction

18. The College’s policy on admission of research students will be defined by its Research Student Admission Policy.

19. Departments must ensure that all newly registered research students receive, following their admission, advice, information and guidance on the key aspects of the research degree programme, the student's workplace environment, the Department's research environment and culture, the wider School and College environment, and access to library, computing and laboratory facilities. A copy of this Code of Practice should be distributed to research students, and the key responsibilities expected of research students discussed with them. Students should also be informed of the induction events offered by the Birkbeck Graduate Research School.

Supervision

20. All academic staff undertaking the supervision of postgraduate research students should have received training in respect of postgraduate supervision as part of their staff development. The training of supervisors and updating of supervisory skills, for example in the light of new research sources, methods and technologies, should be a normal part of continuing staff development, and should apply not just to new or inexperienced supervisors. Departments should ensure that the appointed supervisors have appropriate research expertise for the student's research project and can provide appropriate guidance on research techniques and methodologies. Supervisors who have not themselves successfully completed a PhD thesis will be expected to have equivalent research and publications experience.

21. In addition to at least one Principal Supervisor, a Second Supervisor should normally be appointed for every research student:

Principal Supervisor. The duties of principal supervisors are set out in subsequent paragraphs of this document. There may be occasions in which it is advantageous to have two or more joint principal supervisors, particularly in inter- or multi-disciplinary research projects. In cases of more than one principal supervisor, care must be taken to ensure that irresolvable conflicts between the principal supervisors are not likely to occur, by clarifying at the outset the role of each supervisor and reviewing this regularly. There will be occasions where it is appropriate to appoint as a principal, joint principal or second supervisor a person who is an externally-funded member of staff and/or a person who is a member of another academic institution or a collaborating body. In these cases the College’s Policy on the Appointment of External Supervisors applies.

Second Supervisor: A second supervisor must be familiar with the student's work throughout the programme of study, and available to the student for consultation about the student's research. A second supervisor should be able to take on the role of principal supervisor during any periods of leave of absence of the principal supervisor e.g. sabbaticals, unless the Department is able to make alternative arrangements in such cases. It may also be appropriate for the second supervisor to have a role in the pastoral care of a research student.

22. Individual members of staff with a normal teaching load should not normally act as Principal Supervisor for more than 8 students; any proposal to exceed this limit should be considered by the Research Student Sub-Committee or its Chair acting on behalf of the Sub-Committee.

23. The supervisory team should provide the student with advice on the nature of research and the standards expected; about the planning and due scope of the student's research programme; about the primary sources and secondary literature required to support the project; about the availability of and requirements for attendance at relevant seminars and taught classes; about research techniques (including arrangements for instruction where necessary); and questions of originality, plagiarism and publication of research results.
24. The Principal Supervisor should normally meet with the student for formal consultation three times a term in the case of full-time students, and twice a term in the case of part-time students. The Second Supervisor should be available to meet with the student at least once per term. The number of formal consultations may be varied by mutual agreement as circumstances may require, and may include “virtual” supervision, with the agreement of both parties. Supervisors may also maintain contact through regular seminar meetings. Supervisors are responsible for structuring at least the minimum number of supervisory meetings, and for maintaining written records which record the student’s progress and forward plans and the need for future supervisory meetings.

1 For instance by use of internet-based software that will enable telephone or video conferencing

25. Supervisors should be accessible to students at other appropriate times when advice may be needed.

26. A clear understanding between the supervisor and student should be established at an early stage about the supervisor’s responsibilities in relation to the student’s written submissions. The understanding must accord with University or College regulations, of which the student should be made aware, and must cover the nature and frequency of guidance or comment that the supervisor will offer.

27. Supervisors should give detailed advice on the importance of planning and the necessary completion dates of successive stages of the work so that the thesis may be submitted within the required time.

28. Supervisors should advise on matters relating to the presentation of work in the form of conference and journal papers, including the avoidance of plagiarism and the process of due acknowledgement.

29. Supervisors should, when appropriate, facilitate contacts with specialists in other institutions and, where possible, access to necessary materials and facilities in other institutions and research sources.

30. Written work should be requested as appropriate, and returned with constructive criticism in reasonable time.

31. Arrangements should be made as appropriate for the student to talk about his or her work to staff or research seminars, and to have practice in oral examinations.

32. Guidance should be given to award-holders regarding the submission of periodic reports on their progress, and other regulations and procedures stipulated by their funding bodies.

33. Supervisors should ensure that students are made aware of any inadequacy of progress or of standard of work which is below that generally expected.

34. Where appropriate, supervisors should be prepared to refer students for professional guidance in respect of personal or other problems not necessarily directly related to the research.

35. Supervisors must inform students at the appropriate stage about procedures for the submission of the thesis, about arrangements for the oral examination, and what will be expected of them in defending their thesis, and about the range of possible outcomes of the examination. It may be appropriate to prepare students for the oral examination with a mock examination in the Department.

36. Particular care should be taken with overseas students who may need greater support in the early stages of their research. The assistance needed may include help with language problems and advice about language training. The supervisor should be aware that the period of time available for the completion of the thesis will normally be determined by the funding
available and in many instances will be less than the maximum four-year period prescribed above.

37. Supervisors should ensure that students are aware of their responsibilities, as set out in paragraphs 61-68.

38. Occasionally cases can arise in which difficulties in the relationship between the supervisor and student begin to jeopardise the successful completion of the thesis. Departments should ensure that procedures for requesting consideration of a change of supervisor in such cases exist, and are clearly communicated to research students during their induction period. Such procedures should state that any request for a change in supervisor must be made in writing to the appropriate officer of the College. It is important that Departments make clear that, if a student feels that an effective working relationship is not being established with the supervisor, these procedures provide a means of discussing the possibility of changing supervisors. It is necessary that these procedures should operate expeditiously to avoid loss of time in regard to the research or its funding. However, it should be noted that it is the Department that is responsible for the allocation of supervisors, and that a Department may refuse a request to change the supervisory arrangements where it considers it appropriate to do so. Any allegations of misconduct by supervisors should be dealt with via the Student Dispute Resolution Policy.

39. Departments should provide and communicate to research students procedures by which students can make representations to the Director of Graduate Studies within that Department, or other designated person, if they feel that their work is not proceeding satisfactorily for reasons outside their control.

Progression and Review Arrangements

40. It is the responsibility of Departments to monitor the progress of their research students, to ensure that they are progressing satisfactorily towards completion, normally within 4 years (full-time) or 7 years (part-time).

41. The student and their principal supervisor(s) will report annually to the Department on the student's progress and any problems encountered during the year; the Principal Supervisor will also comment as appropriate on the student's annual report (see paragraph 64). The Department will decide annually whether re-admission should be offered to a student, in accordance with the College's Policy on the Termination of a Student's Registration, and will agree the targets proposed by the supervisor and student to be met in the following academic year; the Department will communicate these targets to the student. Departments must report progression decisions for each research student to the Research Student Unit of Registry Services.

42. In the case of publicly-funded students, supervisors are responsible for submitting formal reports on progress as required by the funding bodies.

43. The regular consultation between supervisor and student should be used to establish and maintain an agreed view of the direction and progress of the research and to identify in a timely fashion any remedial action necessary to redirect the student's work or to revise the agreed schedule for completion within the specified period.

44. If at any time the supervisor forms the view, on the available evidence, that the student's rate of progress is such that the student is unlikely to achieve within the specified period the degree for which he or she is registered, the supervisor should notify the student in writing without delay and discuss with the student ways of achieving the objectives of the student's research plan. If progress remains unsatisfactory the Department should proceed in accordance with the College’s Policy on the Termination of a Student's Registration.

45. Departments should give students the opportunity to comment on all supervisory and other arrangements which bear on their work at regular intervals. Research students should be consulted where appropriate on matters of policy relating to their supervision. Students
should be made aware that they can also raise issues for discussion at meetings of the
Department Student/Staff Exchange Committee or for forwarding to the Research Student
Sub-Committee via the student representative on that committee.

Transfer from MPhil to PhD

46. For students who are registered initially for the MPhil or MPhil/PhD, the procedures and
timescales for upgrading to PhD registration should be clearly set out in Departmental
documentation and communicated in writing to research students.

47. Departments must have a formal procedure for considering the transfer of students' registration from MPhil to PhD. All staff concerned with the supervision of research students should be familiar with the procedure and should comply with it in all respects.

48. The Department’s procedure for transfer must indicate the criteria for consideration for transfer together with deadlines and any documentary requirements. It should specify the point in a student’s course when such consideration would normally be appropriate if satisfactory progress is being made. If award-holders have received funding from UK public sources, their transfer from MPhil to PhD registration should occur in accordance with the funding body’s guidelines and requirements.

49. Applications to transfer should be agreed by the student’s Principal Supervisor and considered by panels, the majority of whom will not be the student’s supervisors. Transfer procedures should specify the constitution of panels that will consider applications to transfer, and the appeal process.

50. If the application is unsuccessful, the student should be informed within 10 working days in writing and given the reasons for its rejection. In appropriate cases, the student should be given detailed guidance on the measures to be taken before any further application for transfer would be considered.

51. A student whose application for transfer is unsuccessful and who disputes the decision on grounds other than the academic judgement of the panel making the decision should have the right of appeal within one month of notification of the decision. Appeals should be made in writing to the Director of Graduate Studies within the Department and should be considered by the Director of Graduate Studies (or appropriate replacement, to be appointed by the Assistant Dean with responsibility for the Department concerned, where the Director of Graduate Studies was a member of the original panel) The Director of Graduate Studies or appropriate replacement may choose to reject the appeal, or to convene a new panel to hear the application; the decision of the Director of Graduate Studies will be final. The outcome of the appeal should be conveyed to the student in writing.

52. There will be no further right of appeal. If, however, the student has good reason to believe that the case has not been fully and fairly considered in accordance with the School’s declared procedures, the student has the right to make a written complaint to the Academic Registrar. On receipt of the complaint the Academic Registrar may consult with other members of the College as considered appropriate. This review will be confined to considering whether the Department, in reaching its decision, did so fully in accordance with its procedures. The conclusions will be conveyed to the student in writing. If the Academic Registrar finds that Departmental procedures have not been observed the Assistant Dean with responsibility for the relevant Department will be asked to arrange for further consideration of the student’s application in accordance with those procedures.

Development of Research and Other Skills

53. Departments should ensure that training in research methods appropriate to the discipline is made available during the first year of study and is adequately publicised to students. Training may be continued in subsequent years as the Department considers necessary. In the case of some Departments, it may be appropriate to arrange training in collaboration with other Departments or external bodies.
54. Departments should ensure that training is available to their students in generic research skills, as recommended in Research Councils UK’s Statement of Expectations Regarding Researcher Development. Such training may be provided in collaboration with other Departments or the Birkbeck Graduate Research School.

55. The College provides training for any teaching duties undertaken by the student; it is mandatory for all research students engaged in teaching to receive such training when taking up teaching opportunities. Departments should monitor the amount of teaching/demonstrating offered to and undertaken by research students, in order to ensure that these do not adversely affect the timescale for submission of the thesis.

56. Throughout their studies, students should be encouraged to develop their knowledge of their research field and their presentational skills by such activities as participating in seminars, making oral presentations of their research in the Department, School or College, or attending relevant conferences or colloquia.

Feedback Mechanisms

57. Departments should provide mechanisms that enable students to comment on all aspects of their studies and to receive responses from the Department, School and/or College, on at least an annual basis. This may be by survey, establishment of student/staff liaison committee, representation on existing committee or other consultative method and may be conducted at School level where appropriate. These mechanisms will be published in Departmental documentation.

58. The College will participate in the annual Postgraduate Research Experience Survey, with results analysed and fed to the College’s Research Student Sub-Committee and appropriate School body for information. The College’s Research Student Sub-Committee will invite a representative from the Students Union to its membership.

Assessment

59. Examiners will be appointed by the College’s research degree examiner panels; examiners will normally be nominated by supervisors. The detailed procedures on the appointment of these examiners is defined within the College’s “Procedures for the Appointment of Research degree Examiners”, (available at http://www.bbk.ac.uk/reg/assessment/phd_external/appointment_examiners or from the Registry). Examinations are conducted in accordance with the College and University research degree regulations.

Student Representations and Complaints

Appeals

60. Any appeal against the decision of the examiners for a research degree will be considered in accordance with the College’s “Policy and Procedure for Appeals Against Decisions of Research Degree Examiners”.

Students’ Responsibilities

61. The student should select his or her research topic, in consultation and agreement with the supervisor. In some cases, the choice may be determined by research projects in progress in the Department or by an external funding body.

62. A detailed research plan must be formulated in consultation between the student and the supervisor as soon as possible and no later than the end of the first term of study for full-time students or first two terms of study for part-time students, in the context of what is appropriate for the discipline. The student and supervisor will complete an agreed outline of the research plan, to include the scope and timescale of the programme of study, which will be submitted for approval via the appropriate process as stipulated by the Department.
63. Publicly-funded students must accept a commitment to make and maintain a research plan which ensures the completion of their thesis within the timescales specified by funding bodies. Funded students must familiarise themselves with the guidelines of their awarding body.

64. Students should monitor their progress against their research plan, and keep their progress under regular review by maintaining a written "research log" or other appropriate form of periodic written self-evaluation which is made available to the supervisor. A formal progress report must be submitted annually to the Department for consideration in accordance with Departmental procedures. These reports will normally be made on a template provided by the Department and should include a self-assessment of academic progress, participation in the activities described in paragraphs 12 and 54 above, supervision, provision of resources, administrative and any other relevant matters.

65. Students should take the initiative in notifying their supervisors of any additional training needs they have identified or any difficulties that have arisen with the progress of their work, however elementary these problems may seem.

66. Students should discuss with their supervisors the type of guidance and comment they find to be most helpful, and agree a schedule of meetings for reporting to their supervisor on the progress of their work.

67. Students should take full account of the scholarly guidance offered by their supervisors and attend the required and recommended training programmes and research seminars. Students should accept a commitment to developing their presentational skills by making oral presentations of their research in their Department, School or College, and attending relevant conferences and workshops.

68. The student should decide when to submit the thesis, in consultation with the supervisor. The supervisor’s guidance will be of crucial importance in assisting the student to make this decision. If Departmental procedures require, the student must also consult with the relevant Departmental forum before reaching a decision.

College Policy and Procedure for the Termination of a Student’s Registration

Introduction

1. The College reserves the right to terminate the registration of any student on academic grounds, disciplinary grounds or where the student is in debt to the College.
2. This policy defines the procedure that must be followed in order for a student's registration to be terminated for academic reasons, or where the student is in debt to the College.
3. Decisions relating to termination of registration for disciplinary reasons must be made in accordance with the College's Code of Student Discipline and/or Dignity at Work & Study Policy.

Termination of Registration of a Student on Academic Grounds

4. The College's Regulations for Taught Programmes of Study and Regulations for the Degrees of MPhil and PhD provide that the registration of any student who fails to satisfy the examination requirements of the programme may be terminated.
5. The College also reserves the right to terminate the registration of a student on academic grounds other than failure in an examination; any such termination must be made in accordance with the provisions of this policy.
6. Academic grounds, other than failure in an examination, for consideration of termination of registration of a student include the following: unsatisfactory academic progress, unsatisfactory attendance at prescribed lectures, seminars, classes, practical sessions or other prescribed activities, failure to complete or submit required written work by due dates or to satisfactory standards, failure to attend for prescribed tests or examinations, failure to comply with examination requirements or regulations.
7. Cases which fall within the jurisdiction of regulations for proceedings in respect of assessment offences will be referred to the Academic Registrar in accordance with the appropriate provisions of the College.
8. Schools are responsible for ensuring that academic requirements to be met by students for normal satisfactory academic progress through the various stages of their programme of study are made known to students. Such academic requirements will be stated in writing and made available to students in the appropriate handbooks or other programme documentation.

Termination Due to Academic Failure During the Course of an Academic Session

9. In the case of serious or persistent failure to meet academic requirements during the course of an academic session, the Programme Director or Assistant Dean with responsibility for the relevant department may issue to a student a written warning of failure to meet academic requirements. Such written warning under these provisions must provide at least three weeks' notice of a requirement to attain specified academic requirements, in default of which the Assistant Dean or Programme Director may request termination of registration of a student on academic grounds.
10. If the student fails to attain, with the period specified, the requirements specified in the written warning, the Assistant Dean or Programme Director must confirm in writing to the student and the Academic Registrar that the student's registration will be terminated.
11. A student wishing to make a request for a review of the decision reached under the provisions of paragraphs 9-10 may do so in writing to the officer in whose name the notification under paragraph 10 was issued. Such written representation must be made within 10 working days of the date of notification; the officer's response should be sent to the student within 10 working days of receipt of the request.
12. A student who wishes to appeal against the decision, following the notification issued under the provisions of paragraph 11 may do so in writing to the Academic Registrar. An appeal may be made on the grounds that:
   - The student has mitigating circumstances that they were unable, or for valid reasons unwilling, to draw to the attention of the officer in whose name the notification under paragraph 10 was issued;
   - That the provisions of this Policy have not been followed correctly;
   - That, given the circumstances, the decision to terminate registration was unreasonable and/or unfair.

13. Any appeal made under the provisions of paragraph 12 will be considered initially by the Academic Registrar; if the Academic Registrar considers that a prima facie case for review has been established then s/he will refer the appeal to an officer nominated by the Master who is not previously connected with the case. That officer will review the appeal and either:
   - Refer the case back to the officer, with recommendations as appropriate;
   - Dismiss the appeal.

14. It should be noted that, where a student’s registration is terminated on academic grounds in the course of an academic session, they will not normally be entitled to any refund of fees paid for the terms up to, and including, the term in which the decision to terminate registration was made.

**Annual Review of Academic Progress and Re-enrolment**

15. Notwithstanding the provisions of paragraphs 9-10, sub-boards of examiners (taught students) and departmental research student committees (research students) are responsible for ensuring that each student's academic progress is reviewed annually and that a decision is made, in accordance with the appropriate College policies and procedures, as to whether admission to the next year of the programme of study will be offered or not. Such decisions will take into account the student’s performance in prescribed examinations and assessments and other relevant aspects of academic performance.

16. In cases where a decision is reached not to offer re-admission, the student concerned should be notified in writing by the appropriate sub-board or committee chair, or officer acting on their behalf.

17. Where a student of a taught programme wishes to appeal against a decision taken during the annual review of academic progress and re-enrolment, then they should proceed according to the College’s Appeals Policy and Procedure. Where a student of a research programme wishes to appeal against a decision taken during the annual review of academic progress and re-enrolment, then they should proceed in accordance with the provisions of paragraph 12-13 of this Policy & Procedure.

**Provisions for Suspension or Termination of Registration as a Student of a Student in Debt to the College or to the University**

18. The College reserves the right to suspend or terminate the registration of any student who is in debt to the College or the University.

19. The registration of any student who is in debt to the College or the University may be suspended or terminated by the Academic Registrar provided that the Academic Registrar has received confirmation that:
   
   (a) The student has been informed by the appropriate officer, on behalf of the creditor, in writing of the payment due to the College or to the University and has been given reasonable notice of the date by which payment was due; and
   
   (b) The student has been informed in writing that failure to pay the outstanding debt would lead to the Academic Registrar being advised of grounds for suspension or termination of registration of the student; and
   
   (c) The student has failed to pay by the due date the sum due.

20. In cases where the Academic Registrar suspends or terminates the registration of a student in debt, the student will be notified on or behalf of the Academic Registrar.

21. Any appeal against the Academic Registrar’s action under these provisions must be submitted in writing within fourteen days of the notification and referred to the Vice-Master,
who will consider the appeal and the Academic Registrar’s action and advise the Master. The Master’s decision on the appeal will be final.
