BIRKBECK, UNIVERSITY OF LONDON

Module/Occurrence Code: SCPS113S4ACB
Department: Psychological Sciences
Module Title: The Developing Child: A Psychological Perspective
Award Designation: Psychology (Certificate of Higher Education)
Applied Psychology (Certificate of Higher Education)
Level/credits: Level 4, 30 credits
Venue: Central London
First class: Thursday 28th September 2017, 7 – 9pm,
No of classes: 22
Class Dates: 28/09/17 - 07/12/17, 11/01/18 - 22/03/18

Please note that this syllabus is provisional and subject to change prior to the class start date. Enrolled students will be notified of any changes by e-mail.

ENTRY REQUIREMENTS
No formal qualifications are required. However, all modules are taught at university level and students should be able to read, write and speak English fluently. Students new to psychology will benefit from undertaking some preparatory reading as detailed below.

AIMS
To review the psychological changes which take place from birth through to the end of adolescence.

OBJECTIVES
- Introduce and explore major theories of child cognitive and social development.
- Introduce and explore key developmental milestones that occur during infancy, childhood and adolescence.
- Introduce and begin to critically evaluate the various research methodologies used in the study of developmental psychology.
- Identify the ethical issues when conducting research in this area (with particular consideration of harm).
- Support and develop students’ study skills, including note taking and essay writing;
- Support students to take part in the assessment process;
- Build students’ confidence in presenting their own ideas and in critical thinking.
LEARNING OUTCOMES
By the end of the course you will be able to:

- Outline and evaluate major theories of psychological, social and cognitive development, focusing particularly on the typical development of the child as an individual.
- Demonstrate an understanding of the development of ideas within this field, and of contemporary approaches and issues.
- Describe, discuss and evaluate a range of research methodologies that might be appropriate to the study of this area of psychology (identifying strengths and weaknesses of core methodologies, including both qualitative as well as quantitative approaches).
- Identify the ethical issues when conducting research in this area (with particular consideration of harm).
- Illustrate the practical applications of research findings.
- Think critically about the subjects covered.
- Present your own ideas about issues addressed on the course.
- Discuss and implement a range of strategies to support your learning.
- Successfully plan and write essays or other assignments which have been set to support your learning on this course.

CONTENT

Concepts and methods
This module begins with a discussion of the history of the study of developmental psychology, a consideration of research methodologies (including a discussion of the particular ethical concerns when studying this particular group) and key concepts and theoretical perspectives. Major theories of child development will be described and discussed as well as an exploration of the role of heredity and environment. Concepts of childhood and adolescence across ages and cultures will be introduced.

Infancy
This part of the module will explore pre-natal development and influences and the birth process as well as aspects of early neuropsychological development. We shall then examine what infants can and cannot do, the process of attachment and bonding with caregivers and differences in temperament.

Social Development
In this part of the module we shall explore key issues in a child’s social development including how children develop an understanding of other people and develop attachments to them, the role of family, and the development of identity including gender and sex roles and moral development.

Language and cognitive development
In this part of the module we explore how children learn to speak, how they acquire reasoning and conceptual understanding and how they think at different stages of
childhood and adolescence. We will also explore the relationship between language and thought, how children learn to read and how they acquire mathematical skills.

**Adolescence**
How do the physical and cognitive changes in adolescence affect feelings and behaviour? In the last part of this module we will discuss aspects of the nature of adolescence and adolescent problems.

**TEACHING AND LEARNING METHODS**
A range of teaching methods may be used e.g. short lectures on the area being studied - students are encouraged to ask questions and discuss points throughout. There will also be small group exercises, sometimes with feedback to the large group to provide an opportunity for clarification of ideas and discussion. Other methods may include: videos, experiments, student presentations, discussion of published articles, etc. Students will be given help with study skills.

Credit points are used to summarise and describe the amount of learning taking place for a given module. For a 30 credit module this equates to 300 hours, most of which is comprised of independent learning. For this module 44 hours would be delivered in the classroom.

Students MUST build on their learning in class by undertaking guided independent study including appropriate reading and research. Further details can be found in the appropriate Course Handbook as detailed below.

**METHODS OF ASSESSMENT**
The assessment process gives students important opportunities to learn, to check their learning and to discuss their progress with the tutor. Students will be expected to prepare four pieces of coursework for assessment, two of which will be written under timed conditions in the classroom. The other two will be completed outside the class and may take a variety of forms such as essays, case studies, reports and possibly class presentations. Each of these pieces will be 1,500 words in length (or the equivalent). You are encouraged to discuss with your tutor the particular topics and the type of assignment you would like to focus on in your assessments. It may be possible to accommodate your personal interests within the syllabus.

Each piece of assessment is worth 25% of the total module mark. To pass the module students must achieve a mark of 40% overall with at least 40% in one of the timed tests.

Dates of timed assessments:
1st Timed Essay:
w/b 13 November 2017

2nd Timed Essay:
w/b 26 February 2018
Regulations regarding assessment are detailed in the appropriate Course Handbook, which will be circulated electronically prior to the course start date. Students are strongly advised to read the Course Handbook prior to commencing their studies.

The course is part of the Certificate of Higher Education in Psychology. If the course is completed successfully, 30 credit points will be awarded, which may be transferred to some degree courses.

Students who complete the core modules on the Certificate of Higher Education in Psychology may be considered for entry onto the second year of Birkbeck’s part-time BSc Psychology programme. For more information see: http://www.bbk.ac.uk/study/2017/certificates/programmes/UEHPSYCH/

READING

This reading list offers a selection of books which are particularly appropriate for this module. It is not expected that students will read them all. Weekly readings will be provided by your course lecturer, who will also recommend other reading during the course.

**Preparatory reading**
If this is the first course you have taken in psychology you will find it useful to read an introductory text that outlines the main schools of thought within psychology and the main approaches to research methods. Particularly useful are:

Please note: Psychology books are frequently revised and updated. Any recent edition would be suitable to use.

**STUDENT SERVICES**
The Student Advice Centre is located on the ground floor of the main Birkbeck building on Malet Street (entry via Torrington Square).

For more information about Birkbeck’s range of student support services visit:  
[http://www.bbk.ac.uk/student-services/](http://www.bbk.ac.uk/student-services/)

**LIBRARY AND STUDY SKILLS RESOURCES**
Once you have your ID card, you may use the Birkbeck library and associated resources. You may find the following web links helpful:

- For information on how best to access the resources available for psychology students through *Birkbeck College Library*, students may wish to work through the tutorial available at [http://www.bbk.ac.uk/lib/life/](http://www.bbk.ac.uk/lib/life/)
- For specific guidance for psychologists and psychology students on getting the best out the internet go to: [http://www.vtstutorials.co.uk/](http://www.vtstutorials.co.uk/) - and search for ‘Psychology’

Please refer to the *Course Handbook* for more information.

**COURSE EVALUATION**
During the course students will be asked to complete an evaluation form which gives the opportunity to provide feedback on all aspects of their learning.

**WHAT CAN I DO NEXT**

It is important you are clear which award the module you are enrolled on counts towards. Our website provides an overview of each Certificate award so you can decide which best suits your needs: [http://www.bbk.ac.uk/study/2017/certificates/subject/psychology/](http://www.bbk.ac.uk/study/2017/certificates/subject/psychology/)

Information is available on core and option modules for each Certificate. Your choice of subsequent modules you take should be informed by this information. Modules can be taken in any order although it is recommended that certain core modules are taken first. Not all core modules have to be taken in the same year.

If you need further advice you can contact the department by telephone on 0207 631 6669 or by e-mail: psychologycert@bbk.ac.uk
