Programme Specification

1	Awarding body	University	y of Lond	don			
2	Teaching Institution	Birkbeck College					
3	Programme Title(s)	BSc Mathematics with Statistics					
4	Programme Code(s)	UUBSMWST_C (3 year full-time) UBSMTWST_C (4 year part-time)					
5	UCAS code	G1G3					
6	Home Department	Economics, Mathematics and Statistics					
7	Exit Award(s)	Certificate of Higher Education Diploma of Higher Education					
8	Duration of Study (number of years)	3 years full-time/4 years part time					
9	Mode of Study	FT	✓	РТ	✓	DL	
10	Level of Award (FHEQ)	6					
11	Other teaching depts or institution	N/A					
12	Professional, Statutory Regulatory Body(PSRB) details	N/A					
13	QAA Benchmark Statement	Mathematics, Statistics and Operational Research					

¹⁴ **Programme Rationale & Aims**

The BSc Mathematics with Statistics aims to provide a broad education in the main areas of mathematics and statistics and the application of the subjects to problems in the natural and social sciences. The programme covers both theoretical aspects of the subjects as well as methods and modelling techniques. Students develop an understanding of a range of mathematical skills together with the abstract background to enhance their comprehension of this material. Computing forms an integral part of the programme both as an aid to understanding the course material and in problem solving. In particular, students will work with statistical computing packages.

In line with the College's mission to make high quality education available to students who are not able for whatever reason to study during the day, the programme is delivered by evening, face-to-face study and is offered both in part-time and full-time modes.

15	Entry Criteria
	UCAS tariff: 112-128 points. A-levels: BBC-ABB, including grade B in mathematics.
	The UCAS tariff score is applicable where applicants have recently studied a qualification that has a UCAS tariff equivalence.
	We welcome applicants without traditional entry qualifications as we base decisions on our own assessment of qualifications, knowledge and previous work experience. We may waive formal entry requirements based on judgement of academic potential.
	Applicants with work experience who do not have formal mathematics qualifications at A level or equivalent, may still gain entry to the programme if they pass an entrance test.

Students whose first language is not English may be asked to give evidence of proficiency at English, and/or attend a pre-sessional English language course. 16 Learning Outcomes On successful completion of this programme a student will have attained the following learning outcomes. Subject Specific: LO1 Knowledge and understanding of, and the ability to use, mathematical and/or statistical techniques. LO2 Knowledge and understanding of a range of results in mathematics and statistics. LO3 Appreciation of the need for proof in mathematics, and the ability to follow and construct mathematical arguments. LO4 Awareness of the use of mathematics and/or statistics to model problems in the natural and social sciences, and the ability to formulate such problems using appropriate notation. LO5 Understand the importance of assumptions and have an awareness of where they are used and the possible consequences of their violation. LO6 Ability to present, analyse and interpret data. LO7 Appreciation of the power of generalization and abstraction in the development of mathematical theories. LO8 Knowledge and understanding of the processes and limitations of mathematical approximation and computational mathematics. LO9 Knowledge and understanding of a range of modelling techniques, their conditions limitations, and the need to validate and revise models. LO10 A deeper knowledge of some particular areas of mathematics and statistics. LO11 Ability to use a modern mathematical and/or statistical computer package will programming facility, together with knowledge of other suitable packages. L012 Appreciation of the historical and cultural aspects of mathematics and statistics. Intellectual: LO13 Ability to comprehend conceptual and abstract material. LO14 Develop a logical and systematic approach to problem solving. Practical: LO15 Ability to use a range of software packages including word processing, spreadsheets and statistical software packages. LO16 Problem-solving skills, including the ability to assess problems logically and to approach them analytically. LO17 Highly developed quantitative skills LO18 Ability to transfer knowledge and expertise from one context to another.

Personal and Social:

LO19 Ability to learn independently using a variety of media.

LO20 Ability to work independently with patience and persistence.

LO21 Time-management and organizational skills.

LO22 General IT skills, including word processing and spreadsheets.

LO23 Good communication skills, including the ability to write coherently.

LO24 Ability to complete a sustained and substantial task.

LO25 Ability to complete work in a limited time period.

¹⁷ Learning, teaching and assessment methods

Most teaching sessions are lectures or occasionally computing sessions. Lectures present both theory and worked examples. Computing sessions use either spreadsheets or a modern statistical or mathematical software package, and enable students to learn about these packages and allow them to develop a greater understanding of the course material. The computing sessions are usually self-paced and informal.

Detailed course notes, problems and worked solutions are provided to accompany lectures on each course. This facilitates the independent study necessary to understand and assimilate the material. Regular coursework and a variety of assessment methods are also designed to be formative and promote learning.

The *Problems in Mathematics* module enables students to develop their knowledge of some areas of mathematics of cultural and historical significance, through self-study, supported by occasional lectures.

Individual tutorials are provided as required and are an integral part of the teaching provision. Students may also consult staff by email and telephone.

The methods of assessment used are:

- Unseen 3 hour examinations in May/June.
- Assessed assignments.
- Essays.

For most modules 80% of the assessment comes from unseen examinations in May/June. This allows time for students to assimilate the material and develop a thorough understanding of the course curriculum. The 20% contribution from coursework enables students to get practice in tackling and solving problems independently, without the time pressure of examinations, and gives staff an opportunity to give relevant feedback.

The range of assessments, and the type of questions and problems set within examinations and assignments are structured to balance theory and practice, to address the individual learning outcomes and to discriminate between different levels of achievement. However the assessment strategy recognizes that students may exhibit very different aptitudes and abilities in different aspects of the course and in different forms of assessment. This is particularly relevant to Birkbeck students who vary considerably in terms of academic background, prior work experience, current career and future career plans. The assessment strategy is therefore designed to: (i) ensure a good coverage of the curriculum and address the range of learning outcomes, (ii) perform an on-going formative function via the theoretical and practical assignments associated with all course modules; (iii) give all students the opportunity to demonstrate their strengths and show what they can do well.

¹⁸ **Programme Description**

The first two years of the programme consist mainly of core and compulsory modules. These modules cover the body of knowledge that every student is expected to know as a key part of university level study in this area. As part of the programme, students may opt to study up to 30 credits at level 4 and 5 in a different subject area, such as management, economics or accounting.

At level 4 (corresponding to Year 1 Full-Time) there are 90 credits of core modules. At each of levels 5 and 6 there are 60 credits of compulsory modules, and 60 credits of options, allowing students to tailor their programme to suit their interests and strengths.

¹⁹ **Programme Structure**

Full-Time programme – 3 years

Year 1					
Level	Module Code	Module Title	Credits	Status*	
4	EMMS096S4	Calculus 1	30	Core	
4	EMMS097S4	Algebra 1	30	Core	
4	BUEM096S4	Numbers, Proofs and Counting	30	Core	
4		Indicative option list below	30	Option	
Year 2	2				
Level	Module Code	Module Title	Credits	Status*	
5	BUEM001S5	Calculus 2	30	Compulsory	
5	EMMS098S5	Probability and Statistics	30	Compulsory	
5		Indicative option list below	30	Option	
		Indicative option list below (students may opt to			
5/6		do at most ONE level 6 maths option with	30	Option	
		approval of programme director)			
Year 3					
Level	Module Code	Module Title	Credits	Status*	
6	BUEM009S6	Problems in Mathematics	30	Compulsory	
		Indicative option list below (if they do a level 6			
6/5		option in year 2, then they do 30 credits level 5 in	30	Option	
		year 3 to compensate)			
6	BUEM003S6	Statistics: Theory and Practice	30	Compulsory	
6		Indicative option list below	30	Option	

Part-Time programme – 4 years

Year 1

Status*

CORE – Module must be taken and passed by student; COMPULSORY – Module must be taken, mark can be reviewed at sub-exam board; OPTIONAL – Student can choose to take this module

20	Regulations				
	 Admissions This programme adheres to the College Admissions Policy <u>http://www.bbk.ac.uk/registry/policies/documents/admissions-policy.pdf</u> 				

	 Credit Transfer Accredited Prior Learning will be considered in line with the College Policy on Accredited Prior Learning http://www.bbk.ac.uk/registry/policies/documents/accreditation-prior-learning.pdf Programme Regulations This programme adheres to the College Common Awards Scheme http://www.bbk.ac.uk/registry/policies/regulations Programme Specific Regulations Students gaining the Certificate in Higher Education in Mathematics from Birkbeck may transfer all 120 credits from that programme, meaning they can go straight to year 2 of the BSc Mathematics with Statistics. Students gaining the Diploma in Higher Education in Mathematics from Birkbeck may transfer all 240 credits from that programme, meaning they can go straight to year 3 of the BSc Mathematics with Statistics. 		
21	Student Attendance Framework – in brief		
	The full version of the 'Student Attendance Framework' is available http://www.bbk.ac.uk/mybirkbeck/services/rules/Attendance-Framework.pdf. Principle Consistent and regular student attendance in class (or equivalent) promotes and affords student success. Inconsistent and irregular attendance is less likely to result in student success and is consistent with lower marks and degree classifications being achieved and awarded.		
	Attendance expectation Birkbeck, University of London expects you to consistently attend all timetabled sessions, including lectures, seminars, group and individual tutorials, learning support sessions, workshops, laboratories, field trips, inductions and demonstrations.		
	E-Registers All Birkbeck students are issued with student cards. Students are expected to take them to classes and to assessment venues and to present them to a member of staff if requested. This is for the purpose of identifying Birkbeck students.		
22	Student Support and Guidance		
1			

All Birkbeck students have access to a range of student support services, details can be found on our website here: <u>http://www.bbk.ac.uk/student-services</u>

23	Methods of Enhancing Quality and Standards		
	The College has rigorous procedures in place for the monitoring and enhancing its educational provision. This includes regular monitoring of programmes drawing on		
	feedback from various sources including external examiner's reports, student feedback,		

student achievement and progression data. In addition, departments are reviewed every four to five years through the internal review process that includes external input.

For more information please see the Academic Standards and Quality website <u>http://www.bbk.ac.uk/registry/about-us/operations-and-quality</u> .
