14	Programme Rationale and Aims
	<p>Aims:</p> <ul style="list-style-type: none"> • to provide a course of part time study in accounting and finance that is appropriate for part time students who are in full time employment • to enable students to develop knowledge and understanding of the theory and practice of accounting • to enable students to interpret complex material and relate theory to practice in a number of subject areas in the field of accounting • to enable students to develop a range of analytical skills that will enable them to critically appraise and challenge existing accounting practices • to enable students to develop the skills required for the preparation of financial statements from the transactions of the reporting entity • to enable students to develop an understanding of organisations and how decisions are made in organisations • to enable students to acquire quantitative skills that can be applied in the analysis of management and accounting problems. • to provide a context within which students can further develop their communication and interpersonal skills • to encourage lifelong learning <p>Distinctive Features:</p> <p>Part-time, evening, face-to-face study, a range of teaching methods (lectures, tutorials, seminars involving case studies and formal presentations), various types of assignments (ranging from essays to mid-term tests), and unseen, formal examinations at the end of the academic term.</p>

15	Entry Criteria
	<p>For applicants who are studying or have recently studied a qualification with UCAS tariff equivalence, the entry requirement is normally a minimum of three 'A' levels with BBC, or equivalent to 112 UCAS tariff points.</p> <p>Students may also be admitted as mature students based on their qualifications, skills, or relevant experience which may include:</p> <ul style="list-style-type: none"> • Any level 3 qualification (Such as A-level or Access to HE Diploma, NVQ Level 3 etc) • Relevant work experience <p>Applicants are expected to have grade "C" GCSE level English and Maths. Applicants who do not meet this criterion and do not hold a Level 3 qualification may be required to carry out a skills audit at a selection evening, which comprises a Mathematics test and an English test. The tests in Mathematics and English determine an applicant's potential to cope with, and benefit from a particular degree programme.</p> <p>Accredited Prior Learning will be considered in line with the College Policy.</p>
16	Learning Outcomes
	<p>The successful completion of this programme will develop intellectual capability through arguments and students will acquire:</p> <ul style="list-style-type: none"> • the ability to question existing knowledge and approaches; • a critical appreciation of the subject matter; • improved communicative style; • more developed interpersonal skills; • quantitative skills that can be applied in the analysis of data and in problem solving; • the ability to work on an individual basis and in a small group; • conceptual and practical knowledge that can be used in the workplace; • the ability to relate theory and practice; • new insights into accounting and finance decision-making; • supervisory and management skills through peer accountability and responsibility; • the ability to take on more challenges which will in turn lead to greater fulfilment; • the ability to analyse case studies in business organisations in the context of a range of theoretical literatures and practically apply the knowledge and skills acquired through the programme; • the ability to evaluate the quality of empirical evidence presented in both management reports and academic journal articles; • the ability to critically assess a body of knowledge and to extend the body of knowledge (via the dissertation/project); • the ability to independently design and conduct research projects; • the ability to work in a group and • good presentation skills.

17	Learning, teaching and assessment methods
	<p>The programme of study has been designed so that as well as receiving information in the form of formal lectures, a student can take charge of their own learning by adopting a participative approach to learning. The tutorial/seminar sessions allow students to interact with their peers and develop insights into analysing and interpreting a wide and varied subject matter. Students will develop their intellectual capability through arguments; learn how to question existing knowledge and approaches; develop a critical appreciation of the subject matter; improve their communicative style; and develop their interpersonal skills.</p> <p>This programme is assessed through a range of assessment methods. Modules that emphasise the learning of numerical skills lean toward the use of mid-term tests coupled with unseen, formal examination at the end of each term. Mid-term tests are short tests set during the term and are designed to provide early feedback on performance. Other modules use individual or group presentations, written essays, or formal end of term examinations, as sole assessments or in combination. In the final year of studies, students independently design and complete a large written assignment, in the form of a research project/dissertation.</p>
